

TOEI COMPANY, LTD.

COMPANY PROFILE

Top Message

Message from the President & Chief Executive Officer

Fill the world with stories that bring people joy

We would like to express our sincere gratitude for your continued support and understanding of Toei Company, Ltd. and the Toei Group.

For more than 70 years since our foundation in 1951, we have continued to engage in film production — the creation of stories — in a consistent manner while responding flexibly to any changes in society and the emergence of any new media, with the support of a wide range of fans.

Why do we continue to create stories?

Because in every era, people have needed stories as nourishment for the mind to give them pleasure and hope, just as they need food, clothing, and shelter, and we want to provide people with these stories.

To date, the Toei Group has created over 4,400 theatrical films, over 39,000 television show episodes, and over 600 episodes of video streaming programs.

We have planned and produced these diverse and appealing pieces of visual content ourselves. Further, as the holder of the intellectual property rights related to them, we have expanded the use of this content in multiple ways, from movie theaters to television, streaming, DVD/Blu-ray, merchandising, games, events, and stage performances, enabling them to be enjoyed by many people.

We have many visual content production facilities, including Tokyo Studios and Kyoto Studios for live action filming, Toei Animation Co., Ltd. for the production of animated content, the Toei Digital Center and Toei Labo Tech Co., Ltd. for post-production, and the Toei Zukun Laboratory for the development of state-of-the-art screen technologies. Regarding our visual content sales channels, we deliver content via our own media outlets in addition to the movie theaters operated by T-Joy Co., Ltd.

Furthermore, we have developed the character copyright business, events developed from our visual content, and even cultural exhibits, providing them to fans via multiple channels.

In these ways, we continue to provide visual content to fans by planning and producing content ourselves and expanding their use to multiple channels. We believe this business model of the Toei Group is our unique strength, something that no other company has.

- Fill the world with stories that bring people joy -

We believe that our mission is to leverage our strengths through corporate activities in order to deliver stories that nourish the mind to the world, thus enriching the world with joy and hope.

To the World, To the Future — To be a company that colors the world and the future with the power of our stories —

In February 2023, we announced TOEI NEW WAVE 2033, the Toei Group's Medium- to Long-Term Vision, which describes our vision for the coming ten years.

The slogan of the vision is "To the World, To the Future — To be a company that colors the world and the future with the power of our stories —."

The stories that captivated us as children stay with us over the years and continue to tug at our hearts, and we believe that these exciting stories should be shared not only in Japan but around the world.

With a growth strategy of strengthening the live action and animated video businesses and achieving their global expansion, we aim to be a company that by 2033, ten years from now, creates and delivers many pieces of content that are loved all around the world.

To achieve this goal, we have established the following four key strategies.

● Maximizing visual content business revenue

As an initiative to strengthen our planning and production capabilities, we will produce two major titles every year, one each at Tokyo Studios and Kyoto Studios, with the goal of earning at least 3 billion yen in domestic box office revenue. We will also create ambitious titles aimed at developing young creators and take an aggressive approach to overseas film festivals. For these purposes, we are committed to the creation of efficient organizations and collaborations with partners both in and outside Japan. Regarding state-of-the-art technologies, we will focus our efforts on the realization of practical applications for digital humans at Toei Zukun Laboratory and for virtual studios at Tokyo Studios, to establish new methods for producing visual content.

We will also proactively develop new channels, including the metaverse and overseas streaming, thus driving our expansion of the multiple uses of our content in Japan and overseas. We will also work to extend the life cycle of intellectual properties and leverage a large number of titles in a multi-layered manner in our efforts to maximize revenue from the visual content business.

● Accelerate global rollout of content

Titles from the Toei Group have been exported overseas and loved by many people, including the animated *Dragon Ball* and *One Piece* series and the live action *Power Rangers* series.

While Japanese animation has established a great reputation internationally, Japan's visual content industry still has only a very small share of the global market. We believe that Japanese animation, live action titles, and content featuring Japanese tokusatsu special effects, still have plenty of potential for growth. Moving forward, we will strengthen efforts to fill the world with stories that bring people joy by collaborating with production companies and creators from all over the world, aiming to increase our overseas sales ratio to 50% by 2033.

● Increase human capital to strengthen the visual content business

It is human resources who hold the key to our capabilities of planning and producing content and expanding them to multiple uses, with which we continue to deliver stories that bring people joy in Japan and other countries.

We will strengthen the capabilities of all of our human resources and leverage their diversity. We will make the company a comfortable workplace that ensures job satisfaction, aiming to achieve the continued growth of the Toei Group.

Specifically, we will strive to improve our workplace environment by working sincerely on measures such as the improvement of production sites and other work environments, the elimination of harassment, and efforts to embrace diversity and inclusion.

● Reinforcing the management foundations that support sustainable challenges and growth

Investment in production equipment is an essential part of supporting production infrastructure. We also believe that it is important to invest in real estate, which is expected to provide stable revenue, because of the highly volatile nature of the visual content business, where there are huge gaps between the revenue of hits and non-hits.

Furthermore, to strengthen corporate governance, we transitioned to a company with an Audit and Supervisory Committee and introduced a performance-based stock remuneration system for directors, etc. in June 2022. In January 2023, we established the voluntary Nomination and Compensation Committee, another initiative in our continued strengthening of corporate governance.

We will also identify and address material issues as we believe that the establishment of a sustainable society is essential for the increase of the Group's medium- to long-term corporate value.

Regarding our capital and financial strategy, we plan to invest a total of 300 billion yen (240 billion yen in content production and 60 billion yen to reinforce business foundations) in our growth over the next ten years.

Toei's opening logo, Araisoto Nami (rocky shore and waves) shows waves crashing onto the rocks. For more than 70 years, we have been delivering stories to fans by overcoming difficulties like those waves, no matter what may be taking place in the world.

And now, we feel that times have changed once again, and it is time for us to change with it. We will continue to strive to provide the stories that bring people joy to fans all over the world as we move toward 2033, the target year of the plan.

In these activities, we sincerely appreciate the continued support of our fans, shareholders, and other stakeholders.

Fumio Yoshimura

President & Chief Executive Officer

The Toei Group promotes ESG practices based on our corporate philosophy of “creation and delivery of entertainment loved by people around the world” through consistent film and video production.

Environmental

Continuing to provide Entertainment while tackling Environmental problems

The Toei Group has film and video production studios in Tokyo and Kyoto and is working on the development of an independent system that can address current external factors (such as natural disasters and diseases) in order to consistently provide movie entertainment. In the near future, we aim to become more eco-friendly across the entire Toei Group.

Development of film and video production processes that are friendly to environment and people

The boom in streaming media has lead to a growing need for different content both domestically and overseas. Meanwhile, virtual production (hereinafter referred to as “VP”) has been attracting attention globally as a way of realizing the development of a continuous and efficient production system, amid COVID-19-induced restrictions on location shooting and reduced hours due to reforms in working practices. Our company set up a new VP Department in October 2022, which is scheduled to start operation in 2024 after undergoing renewal to become the largest* LED studio in Japan, equipped with an LED wall 5 meters high and 30 meters wide. *As of January 2024

Through the use of VP, we will be able to address environmental issues, such as the reduction in emissions from vehicles for location shooting and the reduction of waste generated by dismantled sets. We will pursue a form of VP achievable thanks to the human resources and technology, in fields such as art design, costumes, and lighting, accumulated over the 70 years since the studio's establishment.

Virtual Production

Behind the Scenes

Final Visual

Social

Aiming for a Society where everybody has a Smile on their face

As part of the visual entertainment industry, the Toei Group aims to be a corporate group that values the smiles of its employees and stakeholders.

For the safety and smiles of all employees in the Toei Group

In order to continue offering high-quality content and services, we believe it is indispensable to develop an environment where the physical and mental health of all employees is protected and where they can perform to their full potential. To achieve this, we actively promote employee wellness as a business asset, the reform of working practices, the elimination of harassment, and respect for diversity.

Social contribution through the use of visual content

We apply our visual content production abilities to the development of educational content, with topics regularly updated to reflect modern needs, in order to contribute to the improvement of society. In addition, we conduct accessible screenings for disabled viewers with subtitles and audio guides, and mobile movie screenings that reach out to remote communities with no movie theaters nearby.

Conservation and effective use of video assets

Since its foundation in 1951, our company and its group companies have produced all kinds of content, including movies, TV shows, and animation. In order to preserve valuable film and video works that would otherwise be lost due to film deterioration, we restore film and scan its data, allowing the works to be enjoyed again as digital cinema or via diversified visual media.

Accessible Screening

Mobile Movie Screening

Corporate Governance

Pursuing a world-class level of governance

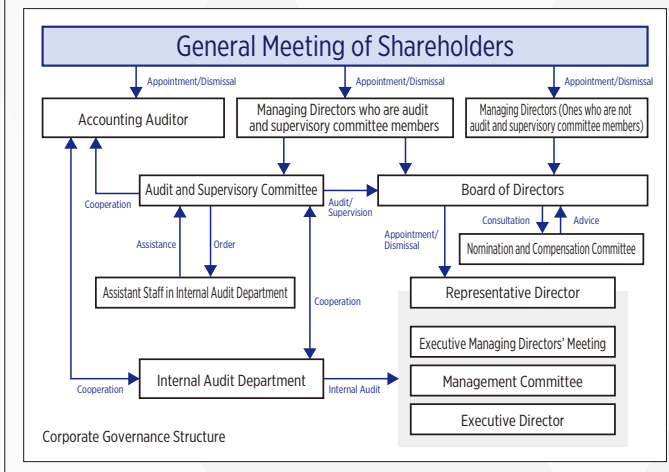

We established an Audit and Supervisory Committee as approved at the general meeting of shareholders on June 29, 2022. We aim to enhance the governance system further to become a trusted company.

<https://www.toei.co.jp/company/esg/governance/>

For sustainable growth and improvement in mid- and long-term corporate value

Since its founding, our company has striven to provide high-quality and sound entertainment through the production and multilateral marketing of diverse content. The foundation of our company and our corporate group lies precisely in continuing to produce and provide high-quality content. We will continue to engage in business activities based on the philosophy of “creation and delivery of entertainment loved worldwide” through consistent film and video production. We will also strive for sustainable growth and mid- and long-term improvement in our corporate value by actively engaging in business development in film and in related fields, with the aim of becoming an integrated content company that creates and delivers high-quality and sound entertainment.

In order to achieve the goals of sustainable growth and improvement in the mid- and long-term corporate value listed above, our company will work on the enhancement of corporate governance, respecting the intention and spirit of the Corporate Governance Code.

Creative Energy

Our Creative Energy

We are delivering to the public IPs that we produce on our own in a multi-use manner.

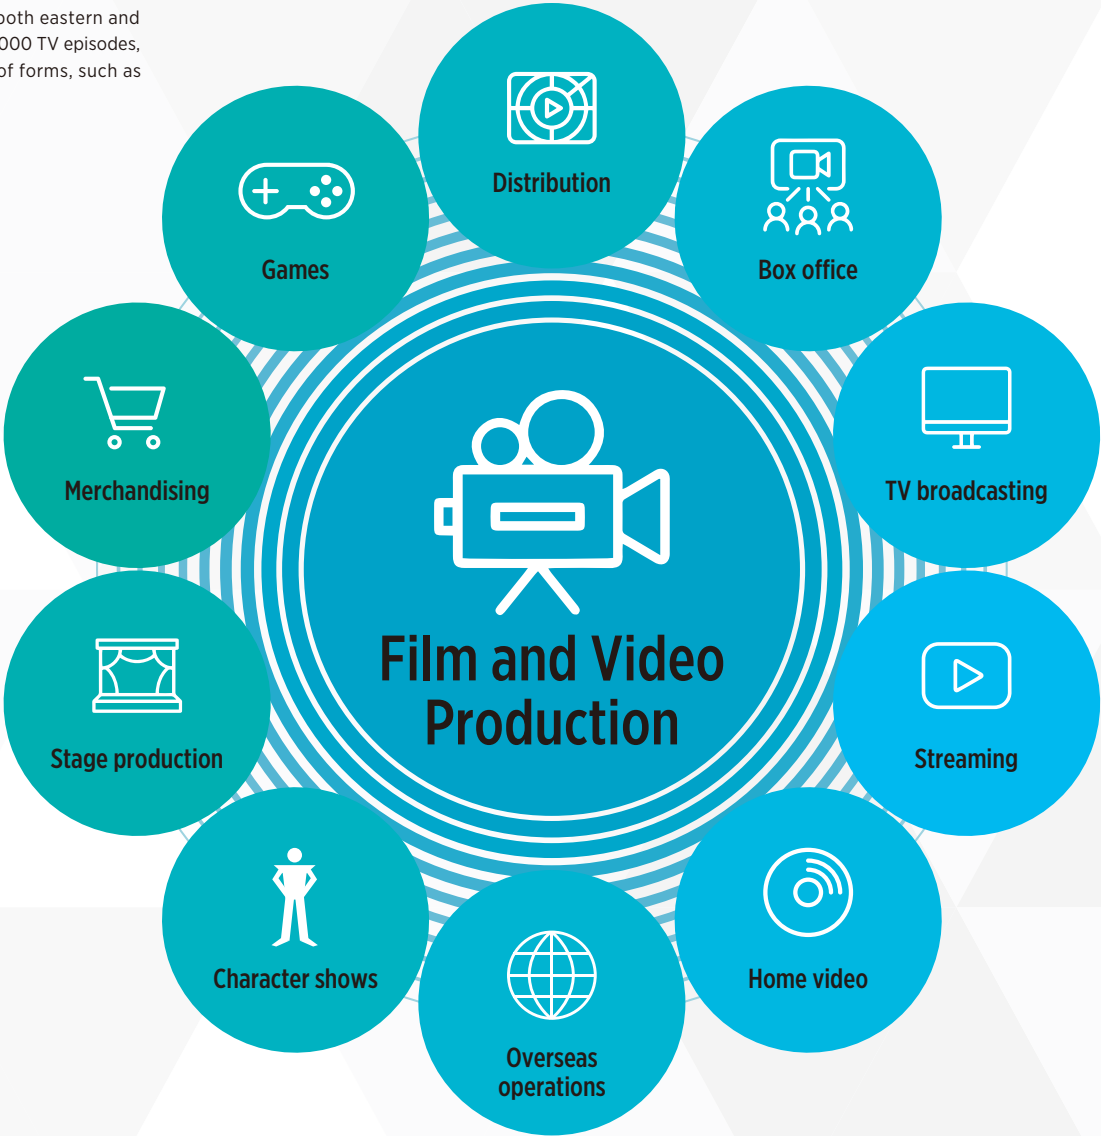

With Toei Tokyo Studio and Toei Kyoto Studios, only our company has domestic studio locations in both eastern and western Japan. The number of IPs produced mainly at those studios exceeds 4,400 theatrical movies, 39,000 TV episodes, and 600 episodes for streaming services. Those visual contents are used and delivered in a variety of forms, such as theatrical screenings, TV broadcasting, streaming, home video, character shows, and commercialization. We produce and deliver original IPs to the public in a variety of forms.

Toei Tokyo Studios & Digital Center

In Tokyo

Here at one of Japan's largest film and video production sites, around 40 movies, 150 TV programs, and 100 TV commercials are produced annually. It has both the latest digital technology and advanced visual content production technology amassed over years of experience.

About Toei Tokyo Studios

▶ Here at one of Japan's largest film and video production sites, around 40 movies, 150 TV episodes, and 100 TV commercials are produced annually.

▶ Operations involving our LED studio, with a newly-installed LED wall 5 meters high and 30 meters wide, will begin in 2024 at the Virtual Production Department, which consistently produces new content with the latest digital technology and advanced visual content production technology amassed over years of experience.

About Toei Digital Center

1. Post-production

▶ Over 100 visual contents are produced here annually due to extensive audiovisual facilities, 14 rooms for offline editing, 11 rooms for sound editing, and a large-scale screening room (130 seats).

▶ We were the first to install a dubbing stage with Dolby Atmos® sound system in Japan, which is now also used to produce concerts and stage productions.

2. Zukun Laboratory

▶ Zukun was derived from "Zukunft," which means "future" in German. With a mission to "design the future of content," Zukun Laboratory is engaged in research, development, and production.

▶ We are especially focused on digital humans and production technologies for real-time digital content.

▶ In addition, we provide high-quality and highly efficient content production services both internally and for outside companies, using our ultra-high-precision face scanning system "Light Stage," and motion capture/facial capture facilities effective for character animation.

Toei Kyoto Studios

In Kyoto

Toei Kyoto Studios has a wide range of production abilities catering to all genres, in addition to its expertise in period dramas. Toei Kyoto Studio Park, adjacent to Toei Kyoto Studios, is one of the major theme parks representing the tourist city of Kyoto, and is very popular among families as well as period drama fans.

About Toei Kyoto Studios

- ▶ Toei Kyoto Studios, which was first built as the Uzumasa Studio of Bando Tsumasaburo Production in 1926, is the most traditional business site in our company.
- ▶ We have not only advanced technology and expertise in period drama production but also an ability to produce a variety of genres.
- ▶ We actively develop digital technology to pursue further advancement of film and video production.
- ▶ We play a key role in Japanese culture due to our unmatched high-quality skills in period drama production (including art design and costumes), our cooperation in overseas productions providing filming locations, and as a popular tourist attraction.

About Toei Kyoto Studio Park

- ▶ Toei Kyoto Studio Park was founded in 1975 as the first theme park in Japan where visitors could see live movie shootings, by opening part of the outside set of Toei Kyoto Studios to the general public.
- ▶ Not only do we provide excellent attractions enjoyable for all ages, but we have also held multiple events in collaboration with popular IPs. It is loved by many as a theme park representing the tourist city of Kyoto.
- ▶ Toei Kyoto Studio Park will undergo a major overhaul as it marks its 50th anniversary in 2025, with renovations starting in 2024 and scheduled to end in 2028, turning the location into a fully immersive experience of the Edo Period.

Movies

Toei brings joy to many people through its mainstay business of producing, distributing, and showing movies.

About Toei's Movies

- ▶ We distribute around 20 titles annually.
- ▶ We handle a wide range of genres including live-action films, animation, and special-effects (tokusatsu) films.
- ▶ We produce movies at our studios in Tokyo and Kyoto, as well as Toei Digital Center that pursues cutting-edge video technology.
- ▶ We have the ability to deliver content strategically to a wide target audience as we handle planning, production, distribution, advertising, and the box-office all in one company.
- ▶ We will continue to make every effort as a key player in the Japanese film industry.

Merchandising

Toei's license business consists mainly of merchandising of special-effects (tokusatsu) superhero programs and licensing them for use in commercials and marketing for other companies.

About Toei's Merchandising Business

- ▶ We manage the copyrights and sales of our character-based content.
- ▶ The target audience of the *Kamen Rider* series and the *Super Sentai* series, which have continued for over half a century, ranges from children to adults.
- ▶ We conduct a wide range of businesses, merchandising characters in various forms such as toys, apparel, everyday items, food, beverages, stationery, publications, CDs, games, and character rooms at hotels, as well as licensing them for use in other companies' commercials and campaigns.
- ▶ We will continue to merchandise our widely-loved characters in a way that brings joy to their fans.

DX GOTCHARDRIVER

DX Boonboomger Robo

Streaming Services

We license the rights for video streaming to service providers, and also produce original streaming content. In addition, we manage owned media such as the Toei Tokusatsu Fan Club and the Toei Tokusatsu YouTube channel.

About Toei's Video Streaming Business

- ▶ We were the first in the Japanese visual industry to establish a video streaming-specialized department in 2001. We license content to domestic and overseas video streaming service providers.
- ▶ We also manage owned media such as the Toei Tokusatsu Fan Club, Toei Tokusatsu YouTube channel, and Toei Jidaigeki (period drama) YouTube channel.
- ▶ We also produce original content for streaming, in addition to licensing the secondary use of movies and TV programs.
- ▶ We will continue to provide productions that people love by keeping our eyes open to the latest trends in online streaming and fully utilizing our sales and production skills accumulated in the industry.

Licensing(TV & Videogram)

Broadcast rights/Home video rights

We license our titles for TV broadcasting, distribution, and home video, and maximize the value of these titles by carefully controlling the license periods and other terms and conditions for each work.

*For licensing in video streaming, see Streaming Services (p.8).

About Toei's Domestic Licensing

- ▶ We license the rights for broadcasting to broadcast media (over-the-air broadcasting and BS/CS satellite broadcasting) throughout Japan, including Toei Channel, the CS broadcast channel owned by the Toei Group.
- ▶ Home video rights for our IPs are licensed to DVD and video vendors, such as our subsidiary, Toei Video Co., Ltd.
- ▶ We maximize the value of the titles with appropriate syndication window control.
- ▶ Library masterpieces, as well as new titles, have long been in demand on various media

Educational Programs

We also create educational programs for use in schools and for social use, and for which we have the largest market share in the industry. In addition, many of our programs have won prizes at domestic and overseas competitions.

About Toei's Educational Video Productions

- ▶Original productions: We plan, produce, and distribute video in fields including human rights awareness, traffic safety, disaster prevention, consumer education, and educational materials for schools by researching and collecting information on subjects that reflect modern needs.
- ▶Commissioned productions: We also produce commissioned videos for public relations by government agencies and for corporate use.
- ▶We handle a wide variety of genres, including dramas, documentaries, animation, and commercials, to meet the different needs of government agencies, schools and companies.

TOEI ANIMATION

Toei Animation Co., Ltd., was founded in 1956 as the first full-fledged animation production company in Japan. In 1958, we produced Japan's first full-color theatrical feature film, *The White Snake Enchantress*, and in 1963, Japan's first original animation TV series, *Ken, the Wild Boy*. Toei Animation has been at the forefront of animation production for over half a century.

In recent years, with increased opportunities both domestically and overseas thanks to advancements in digital technology, we boast Japan's largest library of world-class animation content totaling more than 13,300 episodes. We will continue to produce and improve on our animation as a form of communication that transcends media, crosses borders, and connects the world, so that we can nurture the dreaming hearts of children and deliver bright hope and rich imagination to them as much as possible.

TOEI ADVERTISING

Toei Advertising, Ltd., is a full-service advertising agency engaged in the preparation and implementation of media plans and the planning and management of commercials, PR videos, and 2D graphics. In addition, we actively take part in the entertainment business, handling advertising and promotion for film features.

We also have a long history of experience in utilizing IPs from other companies including the Toei group for character licensing. For the Super Sentai series, we support sponsors by providing services ranging from planning, production, and broadcasting to the merchandising of related characters, event promotion and POP marketing.

In addition, our staffing/recruiting service Toei Career One provides excellent human resources.

We will continue to provide customer solutions by offering high-quality communication through our advertising and promotion businesses.

TOEI COMMERCIAL FILM

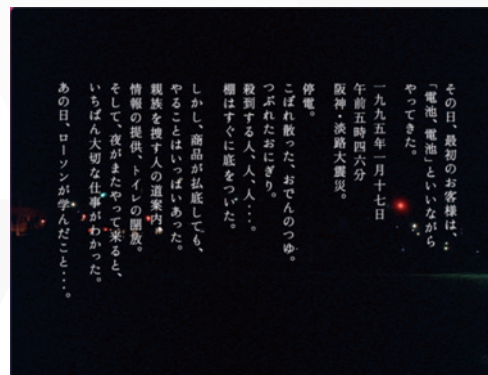

As a long-established commercial production company, TOEI COMMERCIAL FILM CO., LTD. has a brilliant track record, including being the first-ever Japanese winner at the Cannes Lions International Advertising Festival in 1962 for the commercials for Kotobukiya (currently Suntory) Akadama Port Wine, and receiving the ACC CM Festival Grand Prix award 2 consecutive times in 1977 and 1978 for the commercials for Ryukakusan and Matsushita Electric Industrial (currently Panasonic Corporation) respectively. Today, we produce 150 TV commercials annually for a variety of businesses that include food, beverages, pharmaceuticals, information, entertainment, finance, publishing, land transportation, and restaurants. In addition, we also produce visual content such as online videos, promotional videos, theatrical movies, live-streamed events, and TV programs.

TOEI SATELLITE TV

Toei Satellite TV Co., Ltd., was established as a communications satellite station in 1998. Since then, we have run the entertainment channel Toei Channel, which mainly broadcasts works by Toei. We offer content in a wide range of genres that only Toei with its over 70 years of history can provide, including much-talked-about new films, classic period dramas, gangster films, animation, special-effect (tokusatsu) superhero movies and shows, and detective dramas. In addition, we offer programs enjoyable for viewers of all ages, such as special features in line with the release of theatrical movies, memorial projects for masters of cinema or famous actors/actresses, and broadcasts of previously unreleased content.
